

EZ-Steer®

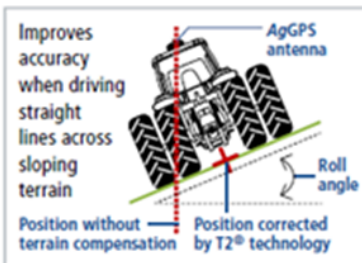

Assisted Steering System

*Entry level solution for simple hands free steering operations.
Easy to install and transferable between multiple vehicles.*

EZ-Steer is a simple portable hands-free steering system for all vehicle models, old and new. The EZ-Steer system turns the steering wheel for you by combining a friction wheel and a drive motor, which is commanded indirectly by an output from the guidance display. Easy to install and transferable between multiple vehicles. Maintains accuracy in rough and rolling terrain with T2 terrain compensation. Ideal for WAAS level accuracy, but can be used with higher accuracy options. It can be installed on most brands of tractor and harvesting machinery.

T2 TERRAIN COMPENSATION TECHNOLOGY

FEATURES

- Provides hands-free guidance for your many farm vehicle types
- Integrates directly into the steering column for clear access to cab control
- Allows for unrestricted manual steering when assisted steering is not engaged
- Utilizes terrain compensation technology for high accuracy on difficult terrain
- Ideal for both low-accuracy broadacre and high-accuracy row-crop farming applications
- Complete field applications quickly and accurately
- Reduce operator fatigue and increase safety
- Operate day or night and in dusty or low visibility conditions

Compatibility

- Displays
- XCN-2050™
- XCN-1050™(*)
- XCN-750™(*)
- FM-750™
- FM-1000™
- EZ-Guide® 500
- EZ-Guide® 250

*requires NAV500/NAV900 license
